SURGICAL CONSENT FORM

Date: _____ Pet: _____ Surgery: _____

I hereby authorize the veterinarians of the Winchester Animal Hospital to perform the above procedure(s) and any additional diagnostic and/or treatment procedures as deemed advisable or necessary for my pet. I understand that any additional procedures may increase the final cost. I understand that the hospital requires that all pets have a recent physical examination, be free of all parasites, and be current on vaccinations. I realize that there is always risk when anesthetics and other medications are used and when surgery is performed. I understand that results cannot be guaranteed.

The Winchester Animal Hospital has medical staffing:

Monday through Thursday 8am-6pm, Fridays 8am-5pm and Saturdays 8am-2pm.

If the doctor feels it is necessary, you will be asked to take your pet to the Veterinary Emergency Center for overnight care.

I am aware that pre-surgery blood work is recommended for the safety of my pet today.

My pet has had nothing to eat in the last 8 hours. Owner's Initials: _____

Where can we reach you today? _____

Estimate of today's services: _____ or ☐ See estimate in file.

Payment is due when pet is picked up from surgery. Initial _____

=====

If the doctor finds something unexpected, I would like the following steps taken:

____ Do not perform any extra services to my pet.

____ You do not need to call me, do what is best for my pet within \$ _____

____ Call me before performing any other services. # _____

Microchipping is recommended in all pets. The procedure is more comfortable while you pet is asleep.

The fee of \$56.00 includes insertion of the microchip and the first year's registration fee with HomeAgain

☐ YES, please protect my pet by microchipping today.

☐ NO thank you.

=====

What are stem cells?

Unspecialized
unique cells of the body that have the ability to develop into several different types of cells.

Proliferation
Stem cells can replicate many times, for long periods of time

Regeneration
Stem cells can also regenerate to aid in the replacement of damaged cells

During your pet's surgery, we can remove some of their fat and send it to Ardent Animal Health where they will process the fat to remove your pet's stem cells. They will then keep those cells 'frozen' for the lifetime of your pet. In the future, if an unexpected injury occurs, or when normal changes happen with age (such as arthristis) your pet will have access to the most advanced (and natural) care available.

Fat retrieval charge and overnight shipping \$243.00

Processing and a lifetime of banking (Paid to Ardent) \$695.00

Visit their website for more info at ardentanimalhealth.com

☐ Yes, please retrieve some of my pet's extra fat for processing.

☐ No thank you.
